Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This action in response to applicant's reply filed 27 March 2003.

Election/Restrictions

Claims 30-43 and 69-70 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Claims 44-57, 62-68, and 71-74 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Election was made **without** traverse in Paper No. 6.

Double Patenting

Claim 61 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 59. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 2828

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 and 58-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,181,463.

Although the conflicting claims are not identical, they are not patentably distinct from each other.

Regarding claims 1-29 and 58, '463 claim 29 claims a laser system comprising a seed source, a pump laser, and an amplifier (part a. of claim 29). There is not disclosed the specifics of the pulses as claimed in the present invention, or that the amplifier is a fiber amplifier. However, these features, as well as those of the dependent claims 2-29 and 58, are more specific embodiments of the device shown in '463 claim 29, and therefore these more specific devices are covered by this device. Patenting of the claims of the present invention would improperly extend the "right to exclude" granted on '463.

Regarding claims 59-61, '463 claim 29, similarly as in the above paragraph, claims a source of seed pulses and an amplifier which inherently inputs and amplifies said seed pulses and outputs amplified pulses. There is not explicitly claimed anything about the pulses being parabolic either in the output or in the amplifier. However, as above, the specific embodiment of the device of '463 is covered by the claim of '463, and thus patenting the present invention will improperly extend the "right to exclude" granted on '463.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

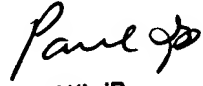

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These all show short pulse lasers that are amplified. They may not show some of the limitations that are claimed, such as the parabolic nature or the specifics of the pulses.
